FOR IMMEDIATE RELEASE

**MODERN HOMES, INC.
AWARDED CERTIFIED GREEN PROFESSIONAL (CGP) DESIGNATION**

Lake Villa, IL, Jan. 6 - Guy Lolmaugh and Brian Lolmaugh of Modern Homes, Inc. became one of the select groups of professional builders, remodelers, and other industry professionals nationwide who have earned the Certified Green Professional (CGP) designation, identifying them as someone with knowledge of the best strategies for incorporating green building principles into homes.

The CGP program is administered by the National Association of Home Builders (NAHB) University of Housing.

"Our team believes strongly in green construction principles and energy efficiency; and has been applying them on our projects for years. We are proud to obtain the official certification from the NAHB and to be able to offer the expertise to our customers," said Modern Homes' President Guy Lolmaugh

A family business since 1948, Modern Homes' services range from new custom home construction to additions and remodeling projects. As a design/build company Modern Homes also offers design services.

The CGP curriculum incorporates a variety of information tailored to green building and business practices. It incorporates training by leading building industry practitioners and academics on a range of topics, including strategies for incorporating green-building principles into homes using cost-effective methods of construction, and how green homes provide buyers with lower maintenance costs and better quality of life. Techniques are also discussed for competitively differentiating home products with increased indoor environmental quality as well as energy and resource efficiency.

CGP program graduates are required to maintain their designation by completing continuing education, a portion of which pertain to green building activities.
